

## Sustainable Innovations in Agricultural Construction

Start date 1<sup>st</sup> of June 2015

Finish date: 31<sup>st</sup> of May 2018

Location:

The Project is dealing with the following EuroDairy Topics:

Animal Care

Socio-economic  
Resilience

## Objective:

The process of intensive planning is based on assessment criteria and sub-criteria for sustainable animal housing systems, which were only applied in an elective module in the department agricultural studies at the University of Applied Science Kiel. Novel ideas for animal housing systems should be assessed in practice to ecological, economic and social sustainability already during the planning phase.

The aim of the OG 'InnoBau' is to support sustainable innovation in agricultural construction with a new, systematic decision-making process. For this, the group develop and test with participating companies from Schleswig-Holstein, Germany, a tool for a systematic planning management, which is suitable in practice.
